PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/529,132

Applicant(s)

BAUMGARTNER ET AL.

Examiner

Christopher Bottorff

Art Unit

3618

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 March 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-13 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-13 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 23 March 2005 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☒ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☒ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

The preliminary amendment filed March 23, 2005 has been entered. Claims 1-13 are pending.

Priority

Acknowledgment is made of applicant's claim for foreign priority based on applications filed in Austria on September 24, 2002 and July 7, 2003. It is noted, however, that applicant has not filed a certified copy of the Austrian applications as required by 35 U.S.C. 119(b).

Information Disclosure Statement

The information disclosure statement (IDS) submitted on March 23, 2005 was considered by the examiner.

Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.

Art Unit: 3618

- (1) Field of the Invention.
- (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-13 are replete with indefinite language. Some examples include, but are not limited to, the following: the expression "especially a ski" in line 1 of claim 1, which is unclear if the claim is limited to skis or can include other types of sliding boards; the limitation "the hardened foam" in line 10 of claim 1, which lacks antecedent basis; and the expression "if appropriate" in line 5 of claim 8, which is unclear if the claim requires steel edges. The claims should be carefully reviewed and corrected to ensure clarity and accuracy.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8, 12, and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Meader et al. US 5,863,050 in view of Jones et al. US 6,557,866.

Meader et al. disclose a sliding board with a running sole 42, an upper shell 32, a lower web 44, steel edges 48, and a foam core 36b. See Figures 4 and 5. A binding system element is connected to the sliding board body by means of at least one anchoring element 18 that is integrated into the core 36b when the core 36b is foamed and is retained by the hardened foam. See Figures 4 and 5; column 1, line 63, through column 2, line 7; and column 6, lines 28-44.

The at least one anchoring element 18 is inserted through at least one preformed opening 52 in the upper shell 32, which at least one opening 52 surrounds the at least one anchoring element 18 without a gap. See Figure 4 and column 6, lines 43-44. The at least one anchoring element 18 has a threaded bore 22 and the threads form indentations and grooves. See Figure 4. The at least one anchoring element 18 is an elongated part made in one piece that extends upwardly from the core. See Figures 4 and 5. The at least one anchoring element 18 bears the binding system element when the binding system element is placed onto the at least one anchoring element 18, and the outwardly curved fillets 26 at the base of the at least one anchoring element 18

Art Unit: 3618

extend the surface area of the at least one anchoring element 18 such that the surface of the at least one anchoring element is enlarged for adhesion to the core material. See figures 4 and 5. The upper edge of at least one anchoring element 18 forms a cutting edge that presses against the opening in the upper shell. See Figure 4. Also, numerous anchoring elements 18 are interconnected by one or more plate-shaped connecting elements 20. See Figures 1 and 4.

Meader et al. do not disclose that the binding system element is at least one rail-type guide element. However, Jones et al. teaches the desirability of providing a binding system element that is connected to a sliding board as a rail-type guide element 54. See Figures 2 and 3. From the teachings of Jones et al., providing the binding system element of Meader et al. as a rail-type guide element would have been obvious to one of ordinary skill in the art at the time the invention was made. This would utilize a structure that effectively holds a boot the sliding board. Furthermore, the apparatus resulting from this combination would be formed by the method of claims 8, 12, and 13 in accordance with the method of construction taught by Meader et al. See column 6, lines 28-44, of Meader et al.

Allowable Subject Matter

Claims 9-11 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Smolka et al., Matsuda, Mayr, Engelbert et al., Hoelzl, Mayr et al., Dogat et al., Jodelet, Abondance, and Riepler disclose various sliding board arrangements and methods for their manufacture.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher Bottorff whose telephone number is (571) 272-6692. The examiner can normally be reached on Mon.-Fri. 7:30 a.m. - 4:00 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chris Ellis can be reached on (571) 272-6914. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
